PANELS

INDUSTRIAL WALL PANELS

Aircrete industrial Wall Panels are the perfect solution to construct large scale commercial and industrial buildings. They also pioneer the building materials market when it comes to practical and durable construction. From giant distribution centers to new shopping malls, Aircrete Wall Panels protect valuable goods due to their outstanding strength and low heat absorption. **These prefab wall panels are also a proven firewall solution, superior to any alternative building material.**

With only 25% of conventional concrete panel weight, Aircrete Wall Panels allow for easy handling, reduced installation time and effective labor allocation due to their simple installation system. The SUPER SMOOTH surface of the wall panels adds to an easy and attractive finish.

- **Length up to 8m / 24ft (standard up to 6m / 20ft)**
- **Easy and fast installation**
- **High load-bearing capacity**
- **Perfect solution for industrial firewalls**

DIMENSIONS AND TECHNICAL SPECIFICATIONS

	DENSITY		
	A-400	A-500	A-550
THICKNESS (mm):	125 - 500	125 - 500	125 - 500
LENGTH (mm):	≤6000	≤6000	≤6000
HEIGHT (mm):	600 - 750	600 - 750	600 - 750
AVERAGE COMPRESSIVE STRENGTH:	2,0 N/mm ²	3,5 N/mm ²	4,5 N/mm ²
THERMAL CONDUCTIVITY (λ-LAMBDA):	0,09 W/mK	0,12 W/mK	0,13 W/mK
SHRINKAGE DUE TO DRYING:	Does not exceed 0.20 mm/m		
DRY MASS:	400 kg/m ³	500 kg/m ³	550 kg/m ³
DESIGN WEIGHT INCL. REINFORCEMENT:	465 kg/m ³	570 kg/m ³	625 kg/m ³
TRANSPORT WEIGHT INCL. REINFORCEMENT:	600 kg/m ³	740 kg/m ³	810 kg/m ³

Dimensional accuracy: as per EN12602.

UNSURPASSED FIRE RATING

Aircrete Wall Panels when used as firewalls, substantially outperform its alternatives, such as concrete wall elements. For example, a 15 cm thick firewall made of AAC can withstand up to 6 hours of direct fire exposure. **Aircrete Wall Panels do not burn**, they are classified as non-combustible, having a **Euroclass of A1 (the highest possible)** and have a **'class 0' (zero) surface spread of flame**.

Installing Aircrete Wall Panels significantly improves operational safety when it comes to protection against fire. **Industrial warehouses, storage areas, logistics centres and all other constructions** benefit significantly from Aircrete's excellent fire protection properties. Standard AAC firewalls can withstand temperatures of **up to 1200°C (2200°F) at least for 4 hours**.

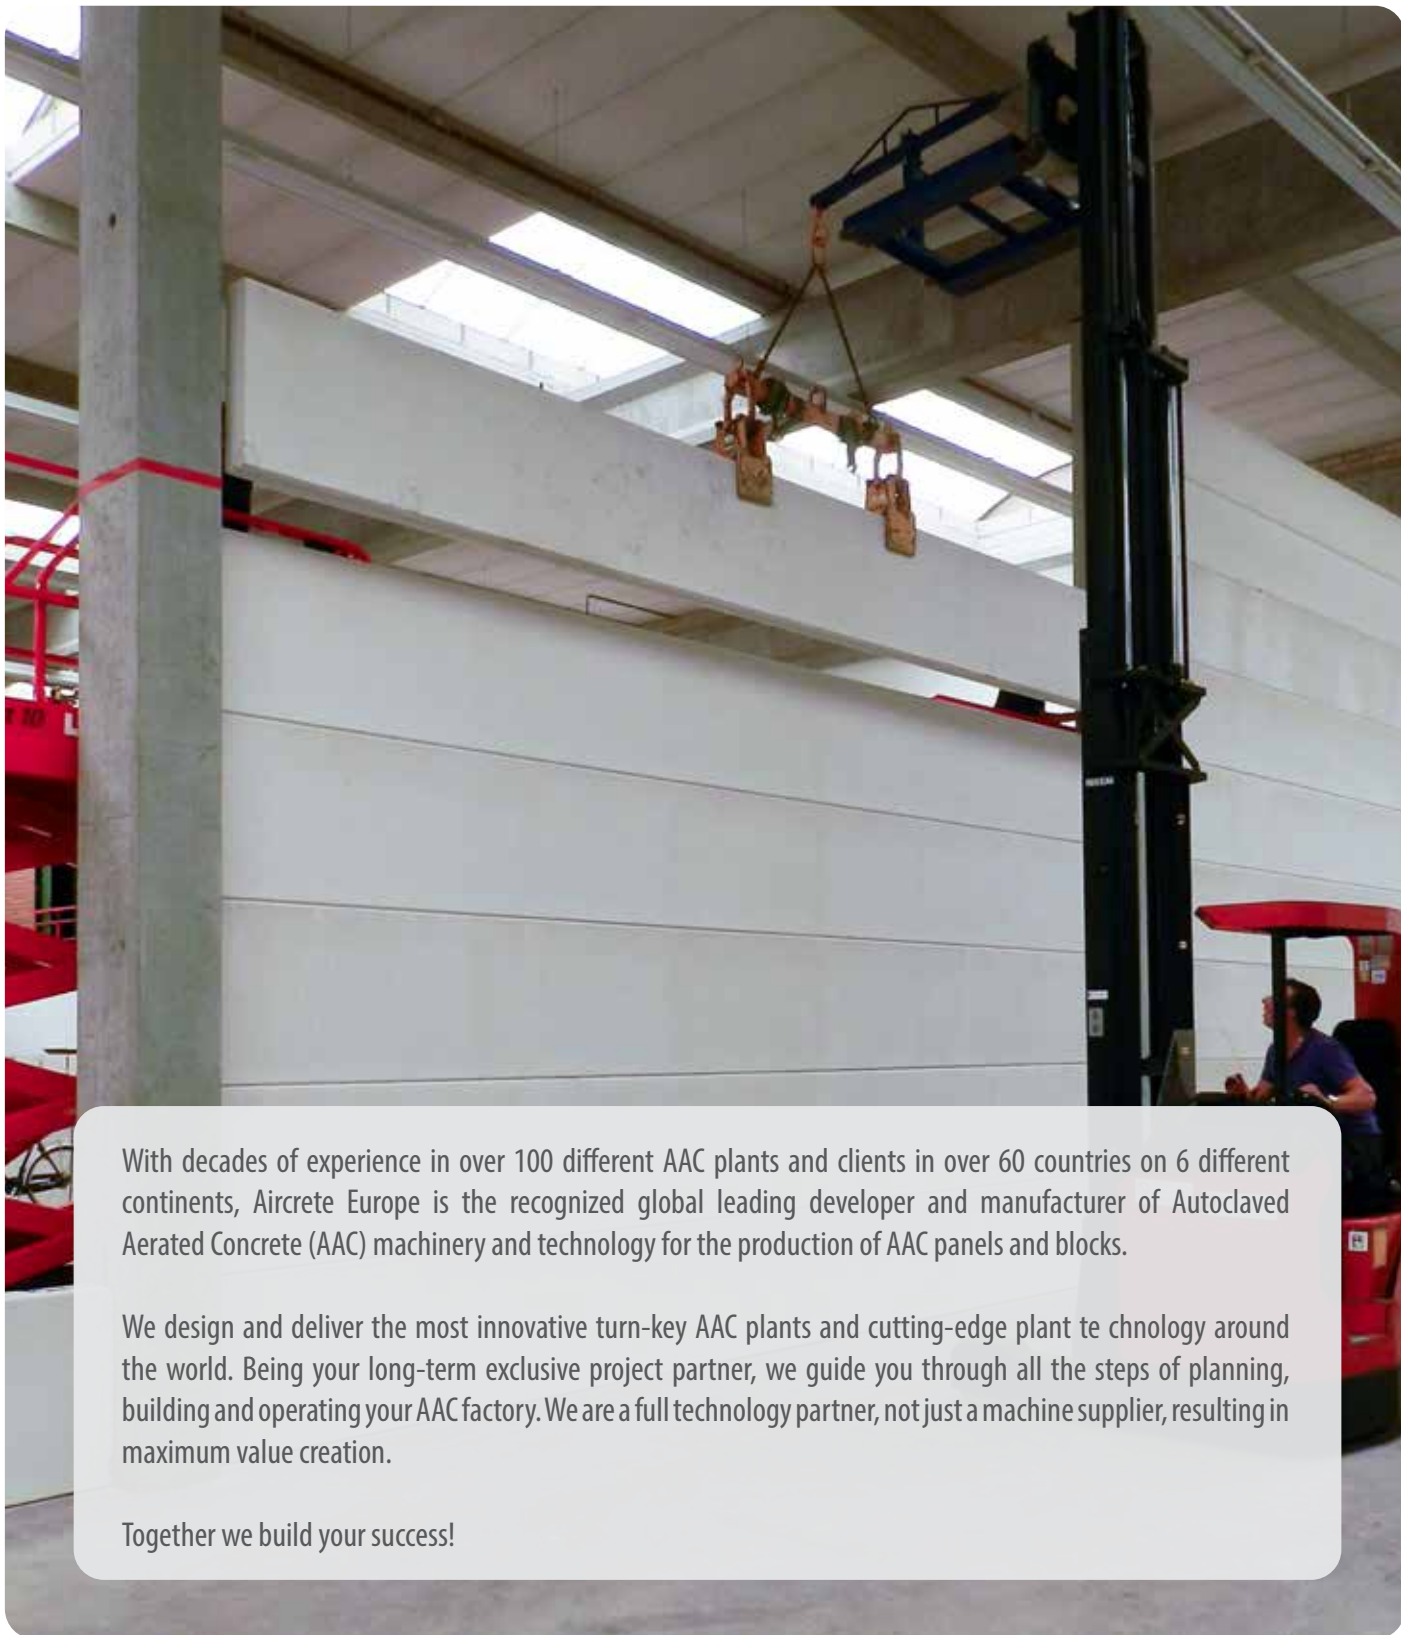

Note: Fire resistance properties of Aircrete firewalls depend on product thickness and finishing type. Values can be found in the following regulations from Europe and USA: BS EN 1996-1-2, DIN 4102-4 and ASTM E-119.

Fire distribution in a building without Aircrete Wall Panels

Fire distribution in a building with Aircrete Wall Panels

With decades of experience in over 100 different AAC plants and clients in over 60 countries on 6 different continents, Aircrete Europe is the recognized global leading developer and manufacturer of Autoclaved Aerated Concrete (AAC) machinery and technology for the production of AAC panels and blocks.

We design and deliver the most innovative turn-key AAC plants and cutting-edge plant technology around the world. Being your long-term exclusive project partner, we guide you through all the steps of planning, building and operating your AAC factory. We are a full technology partner, not just a machine supplier, resulting in maximum value creation.

Together we build your success!
